A few words from the Principal.....Zlatko Pear

End of Term - Well done Myrtleford P12 College!

Well done to our students, parents, staff and the whole college community for continuing to show such perseverance and resilience as we move in and out of remote/flexible learning. It was great to have the Prep - Year 2 and Year 12 students back on site this week. Although we are all getting better at doing this, I think most of us will be very keen for all year levels to return to onsite learning as early as possible next term.

Start of Term Four

All Students sitting a Year 12 (Unit 3 and 4) subject will sit the General Achievement Test (GAT) on Tuesday 5th October. At this stage we have no further information as to when other year levels will return to on site learning. I assume we will receive instructions during the holiday period. We will let you know as soon as we receive this.

Hats compulsory in the yard

A reminder that Myrtleford P12 College is a SunSmart School, this means that all our students need to wear a hat when outside during Term 4. All uniform items, including hats, can be purchased locally at 'Billy and Me'. If you are having problems purchasing any uniform items due to genuine financial difficulties please contact me at the College to confidentially discuss your situation.

Holidays

On behalf of all the staff at Myrtleford P12 College I would like to again thank all our families for their patience and support during this difficult term. Remote learning can be stressful for all involved, particularly for the students. Please staff safe and ensure that the children get a break from school. We look forward to seeing everyone in a couple of weeks. Term 4 will begin on Monday 4th October.

Flexible and Remote Learning 7.0 – Parent Survey

The 7-12 Team is currently seeking feedback from parents regarding their experience of Flexible and Remote Learning. Please use the link <https://forms.gle/WnNtrGNmMGADJH8u5> to complete the short survey.

Many thanks to all the parents/guardians who have supported their young people throughout the last four weeks of remote learning. We recognise that it can be a challenge for both students and families. Hopefully we will be back to on-site teaching and learning early Term 4.

Myrtleford P12 College is a Child Safe School.

All our Child Safe policies can be accessed on the College website.

Remote Learning...what we've been up to!

Book Week in 1S

Some of the Year 1S students dressed up for a Book Week parade.

Creative Writing Pieces from 5H

Students in 5H wrote fantastic creative pieces— all too long for adding into the newsletter, but here are some little passages taken from each one..

The first Squeal By Austin Robb

Hi, I'm Tim and I'm a single kid which means I have no brothers or sisters. Yep, that's right it's just me and my parents that was until I got a pet bin chicken. Why couldn't it have been a dog or a cat, not some sort of chicken?! I was very disappointed. First, I did research on bin chickens and it turns out that they are completely useless. The one cool thing is that they can fly when they're 5 months old, however that doesn't help me because mine is only 3 months old....

House Horror by Isabelle Morrison

....He knew the others wouldn't last long anymore. Since he had the poison attached to him the whole time, he had used it when he first broke into this house. Just leaving drops around the house. In the bathroom, in the kitchen, in the basement and even in the bedrooms. He had finished his poison trail when Sam had caught him as if he was a cop and he was a prisoner breaking out. Although Sam had no gun, he put his arms and hands up. I think you know how the rest goes. Jess and Ari barely even breathing, they knew now that something was in their skin, pulsating through their veins. Jess fainted, causing her to fall, hitting her head right on the metal parts of the study chair. Crimson liquid oozed from her head filling the room as if it was an art space....

The Monsters at School by Blake Fuller

One ordinary day, two best friends named Blake and Jake were walking to school (they have been best friends since Year 4). Jake said, "Look Blake at the big dark shadow in the distance, it looks like a monster!". The boys sprinted to come up with a plan "Let's make a trap," Blake suggested. "But how?" asked Jake. "We have an old shed, thick metal and we are strong," replied Blake. "Ok then we have to be smart about this ok?"....

Friday the 13th by Zack DeLaRue

Chapter 4: The Hut near the Lake

As Connor and Zack were walking deeper and deeper into the forest, they noticed a trail of blood on the grass. "Why is there blood on the grass?" said Connor curiously. "We must follow it," replied Zack. As they followed the trail of blood they noticed a hut near a lake. "Who is on that fishing jetty?" queried Connor.. Connor surprisingly brought some binoculars to take a closer look. As Connor peered through the binoculars, he began to shake in fear. "What is it Connor?" Zack worryingly asked. Connor dropped the binoculars to the ground. Zack....

Predator Recon by Connor Dyball

..."Soo... what do we do Flame?" Zack asked.

I don't know... Zack we lost our coms in the explosion.

Sigh, "Let's go as we don't want to die," I said. "What!" Zack said. "Hey there is a person... never mind he's dead" Zack said. "Flame" What Zack? "There are guns!"...

Clown Town by Daisy Faccin Devereux

....We were just about to play the movie, when all of a sudden we heard a sound... KNOCK KNOCK KNOCK! It was so loud. As I went to open the door, Madi pulled me back like a lioness protecting her cub. "Why did you do that?" I frustratingly asked. Madi scrunched up her face and looked at me: "You forgot, didn't YOU?!". Then Millie butted in more gently: "The promise Daisy, remember?"

D-Day 6th June 1944 by Connor McEwan

....My comrades sprinted for cover. Unfortunately, a German machine gunner struck them. I was as scared as a lost kitten. After what felt like an eternity, we reached the desolate beach. My pistol was water logged so I only had my M 1 Garand (which is a semi automatic rifle). Quickly, I got the smart idea to go on the boat that just got shot down and grab a pistol and Thompson automatic. There were other boats approaching, but they were too far away.....

Creative Writing Pieces from 5H

Students in 5H wrote fantastic creative pieces– all too long for adding into the newsletter, but here are some little passages taken from each one..

The Dimension Books by Jake Hodgkin

....With anger pumping through my body, I ran at Hamones as fast as a cheetah. I swung my swords at him but he dodged it like it was nothing. He just kicked me away with ease. "Most people would have just ran," Hamones taunted, but something told me to keep fighting.....

Roblox by Kade Morgan

....Upon arriving, Millie wondered where we were. Just as Blake was closing the leaderboard he saw ROBLOX THE CREATOR was on the leaderboard. "ROBLOX IS IN THIS GAME!" Blake announced in 'chat'. Then all of us were like OMG! in 'chat'. We split up to try to find Roblox but then we got teleported to a large skyscraper. Boop! We went up to the floor and there he was - ROBLOX!

"Hey kids, would you like to have Robux?" asked Roblox.....

The Ghoul Chase by Kristina Fantonalgo

Many people think monsters aren't real, and that is because they are just made-up stories that came from old people. Back in my country, many elderly people tell stories about monsters lurking around in the deepest, darkest places you have ever seen in your whole life. This story I am telling you about is gonna haunt you your whole life, not really your WHOLE life , but I am sure you will be scared by it....

The Mysterious Man by Max Schipkie

....When I returned to the room, the strange man had vanished. Where could he be? I ran back to my room and tried to find him. Although, while running back, I heard something behind me so I turned around to see him RIGHT BEHIND ME! Like a cheetah, I sprinted back to my room and hid under my bed. He came into my bedroom and looked around before quickly leaving. I attempted to escape, however, he locked the door from the outside so I couldn't leave the house.....

SCP-Breach By Sam Milligan

....The News is on!

While Sam was walking home he ran into some news reporters standing in front of the facility. "Welcome back to Channel 6 News. In today's news story..."

the SCP-facility had some flashing red lights coming from inside the building-

...the reporter came to an abrupt stop. "Hey! What are you doing?! You have no right to be here!" he remarked to a stranger.

Sam watched a person wearing a black vest, white pants, a yellow tinged helmet and a SCP facility logo on his vest and helmet approaching.....

AFL by Shane Barnik

Q3

Honk! "The boy had a chance to get ready for the third quarter and Richmond led by 20 points. Dusty kicked the last goal in the second quarter. The bounce was very high and Soldo gets the tap to Shai Bolton. He kicks to Riewoldt and Riewoldt wins the mark. He goes back on the mark and around the corner gets the goal. Mitch Robison got Martin in the kidney, Martin is hurt and he reaches for the ribs immediately. Cotchin kicks, Shai Bolton marks in the goal square and he goes for the set shot". Honk...

Prom Queen by Sienna Molina

Olivia and Nina looked so retro! I kinda have to admit I loved it! Then, Lily walked in... The room went silent... Lily's face grew bigger as her body grew taller, her face grew like a tomato. It was that red! Everyone was staring at her! Everyone started laughing! She ran out of the school onto the road, we were trying to calm her down! "WAIT! LILY!" I screamed! "STOP!!!"....

The Moving by Emma Pitman

...Snap! A blind that was covering one of the windows (that I didn't know was there) shot up like an arrow. I screamed at the top of my lungs and stepped back, aghast. My parents came running like a stampede of elephants and came to my side.

"What happened honey, you're as pale as a ghost!" puffed my mum, who was out of breath from running to me. "Tha...tt... b..b..lind ju..ju..st... sh..o..t...up..." I babbled incessantly.....

Remote Learning...what we've been up to!

Year 6 Science

In Year 6 we have been doing some lockdown science lessons from the Taronga Zoo. Students then have to add a response about what they have learnt, thought and wondered on the interactive noticeboard- Padlet (see pic)

Ms Bigger

[Virtual Zoo Lessons | Taronga Conservation Society Australia](https://taronga.org.au/education/digital-programs-online-resources/virtual-zoo-lessons)

<https://taronga.org.au/education/digital-programs-online-resources/virtual-zoo-lessons>

Taronga Zoo Aquatic Animals
Add what you think, wondered and learnt about aquatic animals

Kobe CHISHOLM 1d
Small Clawed Otters
 Otters have fantastic fur, they have an under layer that is densely packed together, then they have some guard hair's over the top, that are waterproof, and have air bubbles that are trapped underneath their fur that acts like a big insulating layer, like a puffer jacket, when they go in the water, so their both waterproof and insulated as well. -Kobe

Riley HOWELL 1d
Fishing Cat
 I found it fascinating when they talk about how they use there whiskers to sense where there prey are going to move.

Ryder HARRIS 1d
turtle
 I liked the bit when they told me how big the tortoises shell was and how small the turtles one was.

Hyacinth Sepno 1d
Small Clawed Otters
 I found out that otters can close up their nose and their ears so that they don't get any water in them when they hunt for food.

Anonymous 1d
Meg
 I liked learning about the fishing cat. I wonder if they are like Marri's cat?

Kyran CLARKE 1d
Turtle
 It was interesting them listing the difference between a turtle and a tortoise, and some features that the other one will not have. ---Kyran---

Anonymous 1d
Fishing cat
 Mollies I found out that they can be found in south East australian in wet lands marshes and swamps

Anonymous 1d
Small Clawed Otters
 I learnt that small clawed otters can slow down their heart beat so that they can stay under water longer, I also found out that they can block their ears and nose so that no water gets in and they are the smallest species of otter in the world! - Olive

Donna BIGGER 1d
Can Marri's cat swim?

Donna BIGGER 1d
Ms Bigger

Anonymous 1d
Small Clawed Otters
 Such clever creatures!

Anonymous 1d
Small Clawed Otters
 I found it cool how they use their whiskers to feel different water pressures

Anonymous 1d
turtle
 This is a Moray Eel Who knew that eels were such interesting creatures! I learnt that they travel in the EAC (East Australian Current) to get into the fresh water rivers. I also wonder if there are other species of aquatic cats as I had no idea there was one before this lesson.

Anonymous 1d
fishing cat
 I liked how they explained how they catch there food.

Donna BIGGER 1d
I didn't know that the fishing cat was even a thing!

Anonymous 1d
Tash

Anonymous 1d
turtle
 I liked the bit when they showed the difference between the tortoise and the turtle. I learned that tortoises have big shells and turtles have thin shells. I wonder how a tortoises shell is so round.

Anonymous 1d
Small Clawed Otters
 I found it really cool how their front limbs are partially webbed which means they can use them like hands to catch their prey and eat it. Bella

Anonymous 1d
turtle
 I liked the bit where the turtle stuck its head out and how it made it look like a snake head.

Paige KISS 1d
turtle
 I liked the bit when they showed the difference between the tortoise and the turtle. I learned that tortoises have big shells and turtles have thin shells. I wonder how a tortoises shell is so round.

Anonymous 1d
otter
they spend half of the day in the water and when they spot there prey and catch it which there for im

Anonymous 1d
you forgot your name

Kyran CLARKE 1d
u forgot your name

Charles SAVAGE 1d
Fishing cat
 I like how they told us the difference between a turtle and a tortoises and what the difference between the two are.

Anonymous 1d
indi
 I liked the patten on the shell on the turtle and tortoise, it was pretty cool to see an eel up close and eat the food. I like the way the otter plays and swim. it was cool to see the cat jump up onto the log.

Olive

Sugar Gliders

The Sugar Glider and the Squirrel Glider often get mistaken for each other because they have the same colour fur. Sugar Gliders can live up to 10 years old and can glide up to 20 metres. The Sugar Glider eats sap, nectar and insects. Marley likes mealworms the best!

Remote Learning...what we've been up to!

Hugh and Cooper (with his little sister Makira) found the 'Crackpots' Book Week message.

Preps learning on-site and remotely joined Ms D'Angelo for Italian via Webex

Preps

Author chat with Penny Showers

On Friday the 10th of September, Kate Hawkes allowed me the fantastic opportunity of putting the first three chapters of my middle-grade fantasy adventure novel, 'The Weather Casters,' in front of some avid readers from her class, including a list of questions for them to respond to. I loved the robust online discussion that followed, their passionate opinions were invaluable (being the target reading market). I was completely blown away by their understanding of the writing industry including how they articulated any feedback. The majority of their suggestions will find their way into the edited manuscript, and I look forward to having them review the remaining chapters of the book in term 4 where we will conclude with a session on the craft of writing and the publishing process.

Penny Showers

Remote Learning...what we've been up to!

Year 8 Science

Year 8s have been doing at-home science experiments. Students were tasked to "choose your own" experiment. Here are some examples.

Plastic Milk

Colour symphony

Fizz inflator

And in a separate experiment...'*Investigating how sound moves through different mediums (gas and solids)*'

Ms Mitchell

Remote Learning...what we've been up to!

Food Tech News

Awesome result from Geordie. In Food Technology, students have been sent recipes to try at home and send photos to me. Great work, Geordie! Ms Crawford

'This is me making my scones... and a picture of the finished product! They were scrumptious. - Geordie.'

LIBRARY NEWS

**Victorian
premiers'
reading
challenge**

The Premier's Reading Challenge finishes today, Friday 17th September. All books needed to be entered by today to be included. Congratulations to those students that decide to attempt the challenge, and to those that managed to complete it. Students will receive certificates to celebrate their achievement next term.

Our books are a valuable resource for all students. Over the holidays, please check your shelves at home and return any library books to school in Term 4.

.....Mrs Morgan

Did you know that you can check if your child has a library book?

Head to <http://myrtlefordp12.librarysolutions.com.au> and log on through the "sign in" button on the top right, and then at the sign in page, click on the little 'G' (bottom right), and log on using your child's google classroom log on.

This is also where you can explore the many books we have available in the College library.

If you have any issues with this process, please feel free to email me kathleen.morgan@education.vic.gov.au

Unfortunately at this stage this is only available for Year 3-12 students. Prep-Year 2 students will need to contact me at the library via phone or email, or ask their classroom teacher.

I was very happy to see so many students on our Virtual Library session last week. Ms Hourigan sent this photo of the on-site learning students getting involved.

From pre-lockdown....

Inventors Fair in Year 3/4

Creativity and imagination have the opportunity to soar in a very hands-on format. The students in Grades 3/4 designed and made prototypes of products that are not yet available in stores. During our Inventors Fair the students presented their prototype and explained its purpose and why they came up with the idea. Students used recycled materials and developed lots of higher order thinking, evaluative and public speaking skills throughout the process. We think it won't be long before some of these inventions are patented and worth millions!

Ms McIntyre and Mrs Manning

Talking art with Mrs Craftwright

Here is an update on how our Rainbow Mosaic tree is coming along. All the individual clay bark pieces have come out of the kiln and look amazing as you can see them laid out here by the *Crack Pots*. Kids were very excited to see the frame being held up against the gate as we work out the best way to put it up. A big thanks to Darbs for helping us work it all out.

Kit Cartwright

September Update

Preparing the Wediboard

Students' individual 'bark pieces' (clay tiles) - fired and looking fabulous...

Discussing installation process

PIC•COLLAGE

Back to School.....

Last Thursday 2CU had their first art lesson back at school!!! It was so exciting to have them back. Crafty and The Crack Pots were having a working bee on the front gate area, getting it ready for the installation of our Rainbow Mosaic Tree. They did a fabulous job helping with the gardening but we were a bit sad to see so much rubbish hidden in the garden. The students did an amazing job of collecting all of the rubbish and they had the place looking tip top in no time.

Thanks to the beautiful Grade 2 students to pitching in to keep our school looking beautiful. They are keen to see all the other students follow their lead and make sure we are putting all our rubbish in the bin. Thanks champions and please watch this space, some exciting news to coming soon.

Mrs Cartwright

BACTERIAL TRANSFORMATION EXPERIMENT

Year 12 students were very excited to return to the classroom last week. This was especially true for students in Biology, who returned to conduct a very exciting experiment.

As part of a program with the Gene Technology Access Centre, students were sent materials to conduct an experiment in genetic engineering. The students aimed to insert a gene from sea jellies (commonly known as jellyfish) into a bacterial cells.

Year 12

This process is called **bacterial transformation**, and it is similar to the technology used to produce genetically modified animals and plants!

Working in bacterial genetics requires students to be very careful to keep all their equipment **sterile** (free from germs). You can see that students are wearing gloves and coats, and the Bunsen burner is lit to create an updraft that keeps any airborne microbes from falling into the dishes.

This experiment is part of **Unit 4 Biology** which looks at genetic technologies and their implications for our modern world.

Ms Macrae

HEALTH CORNER...with Adolescent Health Nurse Rosemary Bunge

Last newsletter I promised an update on something that I had been working of for the Year 12 group. Each Year 12 student should by now have received in the mail a survival kit care of all staff at MP12 College. Each item was linked to a positive reminder for the students as you can read below. We sure hope these arriving in the mail helped to brighten their day a little.

As we wonder for the future, I wish all students well and ask you to share in the above reminders no matter what year level you are.

Rosemary

Year 12 remote learning survival kit

Safety pin to keep you safe
Rubber band to remind you to always be flexible
Tissues for the inevitable tears
Smarties to remind you that you are smart
Gum to remind you to stick it out
Paperclip to help keep it all together
Chocolate frog to remind you to hop to it
Sponge to keep soaking up new knowledge
Kit Kat for when you need a break.
Wizz Fizz to remind you that you are a whiz.
Balloon to remind you to keep reaching for the sky.
Mintie to remind you its moments like these that make you more resilient.
Teabag to remind you, you are Tea-ricfic!
Wishing you well, we are thinking of you.

QUOTE OF THE WEEK:

‘You will never speak to anyone more than you speak to yourself in your head, be kind to yourself.’ Amardeep Kumar

Supporting the Community of Myrtleford – From Cradle to Career...

10th September, 2021

Myrtleford P12 College

Dear All,

As an educator and Literacy Learning Specialist at Myrtleford P-12 College, I have a passion to see all children thrive and embrace every opportunity for future success. Life experience plays such a vital role in shaping not just the immediate 'now', but significantly influences future achievements also. It is vital to ensure that all children are meeting developmental milestones, supported through beneficial learning environments from the earliest of times; the cradle, to ensure that future aspirations are realised. How we build protective factors in the early years, opens opportunities for bright tomorrows.

I have a dream! A dream that sees the children of Myrtleford supported throughout their developmental years from cradle to career. Through carefully considered networking and deliberate planning, I believe we could work together to make a lasting and profound impact in the lives of the children and families of Myrtleford. I have a dream that sees every need met, every family invited to take part, every child given opportunity to develop important literacy and numeracy skills, every parent provided opportunity to learn from others as they foster flourishing relationships with their children, and every adolescent cheered on, built in confidence and aptitude, so that no life ambition seems too far-fetched.

With this taking shape in my mind, I was most fortuitous in a chance introduction with Rosie Koop and Sally Matheson from **Tomorrow Today**, Benalla. Once hearing that the community of Benalla have been working together for the past twenty years to first establish and then maintain a not-for-profit organisation to support families and build resilience within the community, I organised a meeting with these ladies and visited onsite. I was so excited to learn more about how **Tomorrow Today** works strategically to build strong partnerships with local businesses, organisations and schools to collectively and actively make lasting change as they aim to meet community need. **Tomorrow Today** began as a tiny organisation in 2002, with a very clear purpose 'to help people work together to create a stronger, more resilient and prosperous rural community.' Their vision is of 'a generous community able to deliver a stronger tomorrow by challenging itself today.'

I am writing to seek supportive interest in attempting to achieve a similar project in Myrtleford. I believe that this aligns beautifully with identified goals outlined in the '**Myrtleford Resilience Plan**,' established by local council in August 2019, also aimed 'to enhance the resilience of Myrtleford's community.'

Will you be part of the dream that sees deliberate, strategic and long term support given to families in need to ensure individual futures are impacted in profound and positive ways? Do you dare to dream with me? If so, I would love for you to respond via email by Friday 1st October to communicate your interest at Ladeane.Lindsay@education.vic.gov.au Once concerned parties are established, we can arrange to meet (whether in person or online), share ideas and make plans together in how best to move forward to make those dreams a reality!

With kind regards,

Ladeane Lindsay

Food For Families.
 Thanks to you.

WAW proudly
 partnering with Uniting
 for Food For Families.

Drop off non-perishable food here
 to help support vulnerable people
 facing crisis this Christmas.
